

Please do not weaken the Indiana Telephone Privacy law. We have been very satisfied not to have our privacy disturbed by unwanted solicitations. If the Indiana law is more restrictive to potential callers than other states' laws, or the Federal law, so be it. Please let the banks, and any other businesses involved in interstate commerce, deal with the differences between the various jurisdictions. Do not take away the privacy and freedom from interruptions that we now enjoy under the current Indiana Telephone Privacy law. Thank you for considering the people's wishes over those of a particular business group.
